What political and economic decisions should Canadians make to protect biodiversity?

1. What is biodiversity?

2. Should economic development be allowed in protected environmental areas? *Use page 329 as a reference.*

- 3. Read pages 330-335 Diary of an Ecowarrior to answer the following questions:
 - a. Citizenship is about building a society where everyone belongs individuals and groups. How does Cliff Wallis's strategy of "building a network" connect to citizenship?

 b. Read the descriptions of the 3 levers: the market, laws and international agreements.
What of these levers could play a role in the environmental issues we have been exploring? Choose one leave and explain a way one lever could impact decision making in regards to an environmental issue. 4. After reflecting on the chapter as whole, how do environmental issues involve political and economic decision making?
